

Team 1: SS Renewal

Seymour Sustainable Renewal

Problem Statement

The team wishes to address the issue of a vacated school building possessed by Inner City Christian Federation (ICCF) with the goal of turning the area it into an establishment that improves the wellbeing of the clients by providing shelter for an underprivileged demographic. The space should also beneficially contribute to the surrounding community.

Objectives

- Determine a structure to meet the needs of our clients that also meets green and energy efficiency standards
- Provide a solution that will be culturally appropriate, just, stewardly, and above all, caring.
- Develop a complete schematic design of the proposal structure with the possibility of a design development plan by the end of the school year
