

Team 10: Auto-Pill

Team (Left to Right): Austin Duimstra (EE), Vardhan Adhikari (ME), Yonggi Kim (ME), Dat Ta (EE), Mark Schultz (ME)

Overview

Our mission is to design an automatic pill dispenser that will store and dispense pills at designated times. The design will be able to release multiple pills during set times of the day using our dispensing mechanism. The design will also have an ergonomic UI which the user or a caretaker will be able to use.
