

Team 3: Eco - Expansion

Project Description:

Team 3 is designing a LEED Gold certified office building for the Calvin Eco-system Preserve adjacent to the existing Bunker Interpretive Center. Focusing on LEED standards, architectural, and structural design. LEED (Leadership in Energy and Environmental Design) is a green building rating system used to categorize buildings in a framework that prioritizes environmentally friendly construction and design.

Goal:

Their goal is to create a space that can represent Calvin's commitment to sustainability while also providing comfortable office space for the Preserve staff including a welcome center, conference room, and ample research space.
