

A Majority of Adults in Michigan's 3rd District Support Action to Limit Climate Change

Constituents in Michigan's 3rd District are worried about global warming, concerned that it will harm current and future generations of Americans, and strongly in support of regulating CO₂ emissions and research into renewable energy technologies. All data are from the Yale Program on Climate Change Communication, available at <http://climatecommunication.yale.edu/visualizations-data/ycom-us-2016/>.

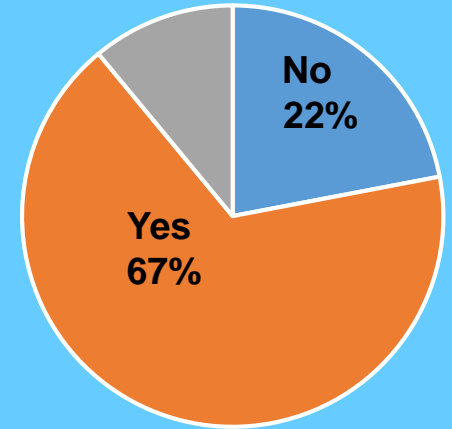

I am worried about global warming

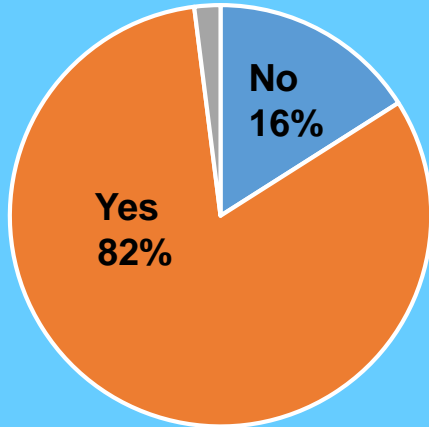

Global warming will harm Americans

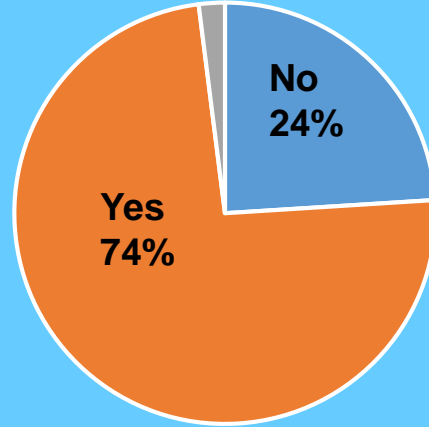

Global warming will harm future generations

I support funding for renewable energy research

I support regulating CO₂ as a pollutant

I support setting strict limits on CO₂ emissions from existing coal-fired power plants
