Order food on the go and pay ahead using the Eatable app

CHECK YOUR BALANCE
Know your meal plan balance and have digital reciepts at hand

Eatable FAQs

What is Eatable?

It's a digital meal card app offered to students through Dining Services.

Where can I use Eatable?

You can use Eatable at Johnny's and Peet's on campus- hands free.
It allows you access to your meal plan as well as other forms of payment.

How does it work?

Once your app is set up, Eatable enables you to pay hands-free with just your selfie. As you approach the register, bluetooth causes your picture to pop up on the register screen, and the cashier verifies it is you making the purchase or entering the dining hall. With a simple tap of your selfie, they check you in or out. Your phone never has to leave your pocket. It's that simple.

What is Mobile Order?

The mobile order feature will enable you to order your food on the go and pay ahead at retail outlets - skipping the line.
